

Audio Cassette

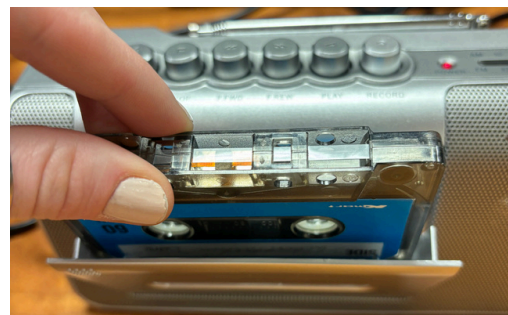

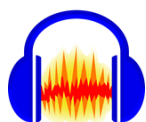

1

Turn on and load the audio cassette into the player. Rewind the tape by using the "F. REW" button.

2

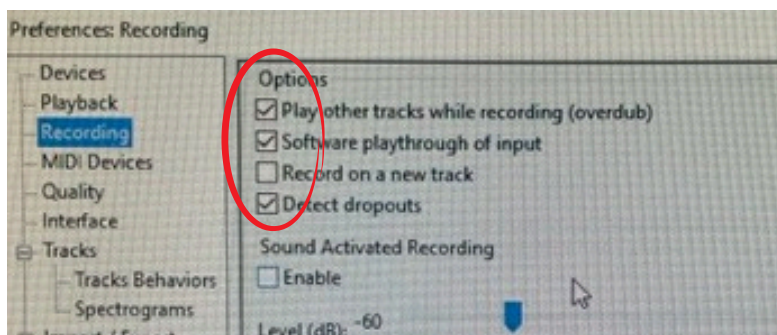

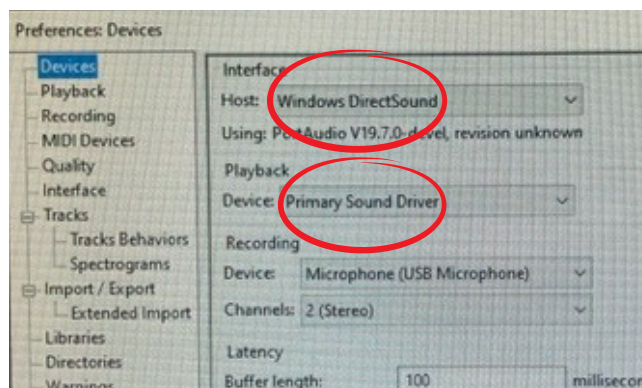

Open "Audacity"

3

Select "Edit" → then "Preferences" → and lastly "Audio Settings" followed by "Recording"

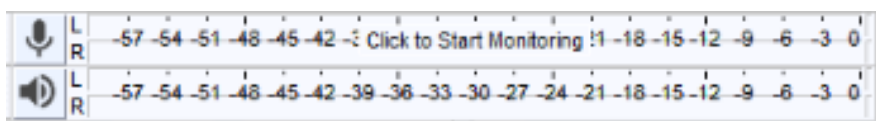

Match the following settings:

4

Select the record button

- Note: You will not be able to hear the audio but you can see it visually if you see green bars here:

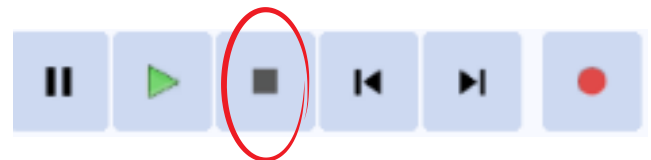

5

Now press play on the player itself

6

Click the "Stop" button on the scanner and the computer when the recording is over.

7

To save select "File"

- Select "Export"

- Select "Export as MP3"

- Now select where you would like to save your audio file (USB drives are most common)
